

IPS Video Solutions in Raiffeisen Banks

For the security of its banks, the Raiffeisen Switzerland Cooperative relies on IPS VideoManager and IPS VideoAnalytics. In order to protect its customers and employees, the independent, local bank institutions are monitored with surveillance cameras all over Switzerland. Since 2010 various institutions have been equipped with IPS VideoManager NVRs for display, recording and control of these video cameras. In addition, these video surveillance systems have been provided with IPS Motion Detection for automatic recording control and event-related recording research. This enables easy and fast retrieval of recorded incidents for evidential purposes.

IPS Intelligent Video Analytics

IPS Intelligent Video Analytics, founded in 1965, is a German manufacturer of sophisticated video products. Since the acquisition by Securiton GmbH in 2006, IPS has been managed as an independent business unit. In recent years, IPS has been developing its latest generation of IP-based software solutions for video analytics and management. The current IPS products are successfully installed in numerous applications in Germany and in the rest of Europe by Securiton GmbH and selected partners.
