IPS Video Solutions in Swisscom Data Centre

© 2014 Swisscom AG

Swisscom AG secures its data centre in the Swiss city Bern Wankdorf with the IPS video surveillance software. As one of the most state-of-the-art data centres in Europe it is certified for the highest level of data availability. The requirement of high standard levels is also applied to the video surveillance system by employing the IPS VideoManager. All interior areas, access points and outdoor areas are monitored by more than 140 cameras, with the IPS video management system providing the operators with an all-encompassing overview at all times.

IPS Intelligent Video Analytics

IPS Intelligent Video Analytics, founded in 1965, is a German manufacturer of sophisticated video products. Since the acquisition by Securiton GmbH in 2006, IPS has been managed as an independent business unit. In recent years, IPS has been developing its latest generation of IP-based software solutions for video analytics and management. IPS products are successfully installed in numerous applications. Selected solution partners, providers and distributors successfully sell the current IPS products across Europe.
