

# IPS Video Solutions for Higher School in Novi Sad

For the prevention of vandalism and theft, the Higher School of Professional Studies in Novi Sad counts on IPS VideoManager and IPS VideoAnalytics. The site has been equipped with an IPS VideoManager NVR for display, recording and control of about 10 cameras. In addition, the site has been supplied with IPS Motion Detection for automatic recording control, IPS Sabotage Detection for camera tamper monitoring, IPS Outdoor Detection for perimeter surveillance and IPS Loitering Detection for the recognition of suspicious behaviour. This provides not only reliable detection of unauthorised access, but also significant reduction of bandwidth and storage needs.

## IPS Intelligent Video Analytics

IPS Intelligent Video Analytics, founded in 1965, is a German manufacturer of sophisticated video products. Since the acquisition by Securiton GmbH in 2006, IPS has been managed as an independent business unit. In recent years, IPS has been developing its latest generation of IP-based software solutions for video analytics and management. The current IPS products are successfully installed in numerous applications in Germany and in the rest of Europe by Securiton GmbH and selected partners.
