

IPS Video Solutions for Onshore Oilfield in Southern England

Perenco UK Ltd selected IPS Video-Manager and IPS VideoAnalytics to help supervise its onshore oilfield sites, including the main processing facility, set within an Area of Outstanding Beauty on the Isle of Purbeck, Dorset, UK .

Due to the local geography, IPS Multi Site Management was employed to support central system administration and alarm management. IPS Outdoor Detection (i-LIDS Primary certified for sterile zone supervision), which provides accurate real-time intruder detection, was chosen to protect the perimeter of each site.

IPS Intelligent Video Analytics

IPS Intelligent Video Analytics, founded in 1965, is a German manufacturer of sophisticated video products. Since the acquisition by Securiton GmbH in 2006, IPS has been managed as an independent business unit. In recent years, IPS has been developing its latest generation of IP-based software solutions for video analytics and management. IPS products are successfully installed in numerous applications. Selected solution partners, providers and distributors successfully sell the current IPS products across Europe
