

IPS Video Solutions in HE Zakučac Power Plant

For the protection of its site HE Zakučac in Omiš, the Croatian power plant provider HEP Proizvodnja relies on IPS VideoManager and IPS VideoAnalytics. The site has been equipped with a comprehensive IPS VideoManager VMS for display, recording and control of about 90 cameras. In addition, the site has been supplied with IPS Outdoor Detection for perimeter surveillance and IPS Motion Detection for automatic recording control. This provides not only reliable detection of unauthorised access under difficult weather conditions, but also significant reduction of bandwidth and storage needs.

IPS Intelligent Video Analytics

IPS Intelligent Video Analytics, founded in 1965, is a German manufacturer of sophisticated video products. Since the acquisition by Securiton GmbH in 2006, IPS has been managed as an independent business unit. In recent years, IPS has been developing its latest generation of IP-based software solutions for video analytics and management. The current IPS products are successfully installed in numerous applications in Germany and in the rest of Europe by Securiton GmbH and selected partners.

Project information	
Customer:	HEP Proizvodnja d.o.o.
Site:	HE Zakučac
Location:	Omiš
Country:	Croatia
Application:	Power plant
Project start:	April 2007
