

IPS Video Solutions in Department Stores

In order to protect its stores from thefts, the biggest Swiss department store chain Manor AG relies on the IPS VideoManager. The store detectives use it to control the sales floors and back rooms of the stores to be able to intervene if need be. The integrated analytics module IPS Motion Detection starts recording events only when objects move around which significantly reduces bandwidth and storage needs. Recordings of thefts are easy to retrieve for the purpose of evidence and thieves are quickly identified. The high image quality of the IPS VideoManager efficiently contributes to the successful police search. Thanks to the implementation of the video surveillance system and other measures the loss of goods was reduced considerably.

IPS Intelligent Video Analytics

IPS Intelligent Video Analytics, founded in 1965, is a German manufacturer of sophisticated video products. Since the acquisition by Securiton GmbH in 2006, IPS has been managed as an independent business unit. In recent years, IPS has been developing its latest generation of IP-based software solutions for video analytics and management. IPS products are successfully installed in numerous applications. Selected solution partners, providers and distributors successfully sell the current IPS products across Europe.
