

IPS Video Solutions in Swiss Casinos St. Gallen

Since the end of 2016, IPS Intelligent Video Analytics protects the gaming operations in the glamorous Swiss Casinos St. Gallen. The casino management's demand for a modern security solution was extremely high as more than 1500 square meters with ten gambling tables and around 180 slot machines invite visitors to gamble or just to linger. With the installation of the IPS VideoManager and the IP based dome cameras the security staff is able to reliably monitor the entire gambling area in real-time making sure that no one has an ace up his sleeve or steals chips from the neighbour at the roulette table. The high picture quality of the camera images and of the IPS VideoManager guarantees an extremely detailed overview of all activities.

IPS Intelligent Video Analytics

IPS Intelligent Video Analytics, founded in 1965, is a German manufacturer of sophisticated video products. Since the acquisition by Securiton GmbH in 2006, IPS has been managed as an independent business unit. In recent years, IPS has been developing its latest generation of IP-based software solutions for video analytics and management. The current IPS products are successfully installed in numerous applications in Germany and in the rest of Europe by Securiton GmbH and selected partners.
