

## Update Note

### Fixes in Installer / Firewall rules / IIS Rules / Documentation

For new installations, please download the complete VideoManager Installation file (VM\_15.0.0.141\_Installation.exe) from the FTP server and use it from now on. For Information about Integrity checking, please consult the latest Installation Instruction document for VideoManager.

### Fixes in VideoManager\_15.0.07 (Update R07)

The following list describes only those bugs that were fixed in the current Hotfix.

Hotfixes are cumulative, i.e. earlier fixes for the same product version are included in the current Hotfix.

For lists of bugs fixed in earlier Hotfixes, please refer to the respective notes provided on our FTP server.

| ID                        | Issue Type | Component(s)                                                               | Issue Description                                                   |
|---------------------------|------------|----------------------------------------------------------------------------|---------------------------------------------------------------------|
| <a href="#">VMD-21535</a> | Bug        | VM - Client, VM - MS Client_x64                                            | Closing memory leak                                                 |
| <a href="#">VMD-21534</a> | Bug        | VM - Client_x64, VM - MS Client_x64                                        | Corrections in port management                                      |
| <a href="#">VMD-21482</a> | Bug        | VM - Installation                                                          | Preventing the error message "no access to database" after restart  |
| <a href="#">VMD-21316</a> | Bug        | VM - DeviceServer_x64                                                      | Avoid TCP Error Zero Window Packets                                 |
| <a href="#">VMD-21312</a> | Bug        | VM - Management                                                            | Switching programs also works in Inactive and Revision status       |
| <a href="#">VMD-21274</a> | Bug        | VM - Client, VM - DeviceServer_x64, VM - Installation, VM - NextGen Config | Inputs from Tecovideo and Bosch camera working when using Onvif     |
| <a href="#">VMD-21117</a> | Bug        | VM - Multi Site Streaming Server                                           | Multi Site Streaming Server works with DNS names                    |
| <a href="#">VMD-20958</a> | Bug        | VM - Access Control Gateway (ONVIF), VM - Management                       | Avoiding Access Control Gateway connection problems                 |
| <a href="#">VMD-18077</a> | Bug        | VM - Installation, VM - Management, VM - Multi Site Management_x64         | Avoiding errors when installing and uninstalling license components |
